CLASSIFICATION OF SERVICE

Commercial Service

RATE PER UNIT

Applicable:

Entire territory served.

Availability of Service:

Annual commercial service supplied through one meter, including lighting, incidental appliances, cooking, heating, refrigeration and power for motors of individual capacities not exceeding  $\frac{1}{2}$  horsepower at 155 volts, or 2 horsepower at 230 volts, or a total connected power load of more than 5 horsepower.

Character of Service:

Continuous, alternating current, 60 cycles, 115 volts or 115/230 volts, single phase. (Voltage at the option of the Company).

Rates:

First 13 KWH or less, per month	\$1.25
Next 87 " per month, per KWH	.06
Next 100 " " " " "	.05
Next 300 " " " " "	.04
All over 500 KWH per month, per KWH	.03

Minimum Charge:

Per meter, per month 1.25

Delayed Payment Charge:

The rate stated above is net and applies on all bills paid within fifteen (15) days from the date thereof. On all bills not so paid an additional charge of 10% of the amount billed will be made.

Terms:

One year and thereafter until terminated by 48 hours' written notice.

**CLASSIFICATION OF SERVICE**

Schedule O. P - 1 (Continued)

**RATE  
PER UNIT**

Determination of Demand:

The demand shall be determined by meter and shall be the highest demand recorded for any fifteen (15) minute period during the month, but not less than 50% of the highest demand recorded during the preceeding eleven (11) months, unless customer contracts for annual minimum charge.

Power Factor:

The rate stated above is based upon an 80% power factor. When the average monthly power factor is found to be less than 80% the demand for billing purposes shall be adjusted to 80% power factor.

Fuel Clause:

See attached sheet.

Special Rules:

1. When the customer having a demand of 100 KW or more maintains a unity power factor, a discount of 20% of the demand charge will be allowed.
2. When the customer's use of service is entirely off-peak, that is, not used during certain hours, specified by the Company from time to time, a discount of 50% of the demand charge will be allowed.
3. Lighting not to exceed 20% of the power demand will be permitted on this classification provided customer furnished his own lighting transformer.
4. Standby service will be supplied under this classification. The monthly demand charge for standby service will be the demand charge for the capacity contracted for. Customer must install approved current limiting device to limit demand to capacity contracted for.

**CLASSIFICATION OF SERVICE**

Power Service

**RATE PER UNIT**

Rates:

Same as O.P. - 1 with the exception of the Fuel Clause as follows:

Fuel Clause:

It is understood and agreed that in case the average cost of coal delivered in the storage bins of the Company at its generating station, including freight, switching and car service charges, consumed at said generating plant exceeds \$2.00 per ton for any month, there shall be added for each such month to all net bills, based on the rate above stated, an additional sum equal to \$.0002 per kilowatt hour (KWH) for each 10¢ increase in the cost of coal above \$2.00 per ton.

It is also understood and agreed that in case the average cost of coal so consumed for any month shall be less than \$1.50 per ton, then the Company shall credit to the customer for such month a sum equal to \$.0002 per kilowatt hour (KWH) for each 10¢ decrease in the cost of coal below \$1.50 per ton.

The Company shall include with the monthly bill for demand and energy charges, the charges or credits due for such month under the terms of this clause, and the consumer shall pay such charges or shall receive such credits within ten (10) days after the date of the bill; and such charges or credits shall be net, bearing no discount.

**CLASSIFICATION OF SERVICE**

Schedule L.P. - (Continued)

**RATE PER UNIT**

Fuel Cost Adjustment Charge:

In case the rate under which Seller purchases power at wholesale is adjusted in accordance with a fuel cost adjustment provision in Seller's wholesale power contract, the foregoing energy charges shall be adjusted each month by the same amount per KWH as the fuel cost adjustment per KWH in Seller's wholesale power bill for the next preceding month.

Minimum Monthly Charge:

The minimum monthly charge shall be the highest one of the following charges as determined for the consumer in question,

1. The minimum monthly charge specified in the contract for service.
2. A charge of \$0.75 per KVA of installed transformer capacity.
3. A charge of \$25.00.

Minimum Annual Charge for Seasonal Service:

Consumers requiring service only during certain seasons not exceeding nine months per year may guarantee a minimum annual payment of twelve times the minimum monthly charge determined in accordance with the foregoing section in which case there shall be no minimum monthly charge.

Delayed Payment Charge:

The above rates are net, the gross rates being 5% higher on the first \$25.00 and 2% on the remainder of the bill. In the event the current monthly bill is not paid within fifteen (15) days from the date of the bill, the gross rates shall apply.

**RATE  
PER UNIT**

Special Rules:

1. Motors having a rated capacity in excess of ten horse-power (10 H.P.) must be three-phase.

2. Both power and lighting shall be billed at the foregoing rate. If a separate meter is required for the lighting circuit, the registrations of the two watt-hour meters shall be added to obtain total kilowatt-hours used and the registrations of the two demand meters shall be added to obtain the total kilowatt demand for billing purposes.

3. All wiring, pole lines, and other electrical equipment beyond the metering point, shall be considered the distribution system of the consumer and shall be furnished and maintained by the consumer.

4. If service is furnished at primary distribution voltage, a discount of ten percent (10%) shall apply to the demand and energy charges, and if the minimum charge is based on transformer capacity, a discount of 10% shall also apply to the minimum charge. However, the Seller shall have the option of metering at secondary voltage and adding the estimated transformer losses to the metered kilowatt-hours and kilowatt demand.
